A plan, with its evidence attached.

Borivali East · 12 Nov 2026 · 2-hour activity

INSUFFICIENT EVIDENCE

The alternative has a lower predicted concentration. AirWindow abstains from recommending a move because decision reliability has not been independently validated.

Original schedule

10:00 am – 12:00 pm IST

61.8 µg/m³ forecast mean

Peak at 10:00 am IST: 62.6 µg/m³

Best predicted alternative

3:00 pm – 5:00 pm IST

59.1 µg/m³ forecast mean

Peak at 4:00 pm IST: 59.3 µg/m³

Predicted difference: **−2.7 µg/m³** · selected minus original

Forecast issued
10 Nov 2026, 3:47 pm IST

PM history cutoff
10 Nov 2026, 9:00 am IST

Latest PM observation
10 Nov 2026, 9:00 am IST

Model
P_fix · TASK011-final-P_fix

Station
11606 · 19.23241, 72.86895

Validation
Matched station validation unavailable. 15–62h historical issue lead; current issue/PM clocks outside comparable evidence
