A plan, with its evidence attached.

Borivali East · 9 Nov 2026 · 2-hour activity

INSUFFICIENT EVIDENCE

The alternative has a lower predicted concentration. AirWindow abstains from recommending a move because decision reliability has not been independently validated.

Original schedule

10:00 am – 12:00 pm IST

56.5 µg/m³ forecast mean

Highest hour: 57.2 µg/m³

Best predicted alternative

3:00 pm – 5:00 pm IST

54.6 µg/m³ forecast mean

Highest hour: 55.0 µg/m³

Predicted difference: **−1.9 µg/m³** · selected minus original

Forecast issued

8 Nov 2026, 3:58 pm IST

Latest PM observation

2 Nov 2026, 11:00 pm IST

Model

P_fix · TASK008-provisional-source-2df272b2b8db

Station

11606 · 19.23241, 72.86895

Validation

Matched station validation unavailable. 193–240h historical issue lead; current issue/PM clocks outside comparable evidence

Artifact

task008-pfix-3d79cffcca78cea1

Monitoring-station forecasts may not represent nearby streets or the event location. No period is labelled safe or medically recommended. This comparison is not a personal exposure estimate. Refer to official CPCB/government guidance for health recommendations.
